FAQ

1

Is the program more suitable for academicians or public health practitioners? Or can both apply?

This program is designed for academicians and public health practitioners passionate about the implementation of science/research. It aims to strengthen implementation science (IS) skills to improve health outcomes while addressing four global health challenges highlighted in the TDR Strategy 2024-2025.

FAQ

2

I noticed that one of the requirements is being employed by a university, research institution, or NGO. Currently, I am not employed but actively seeking research opportunities. Would my application still be considered?

We understand your interest; however, priority is given to candidates currently affiliated with an eligible institution.

FAQ

4

Could you share details about the curriculum and the schedule of activities during the fellowship?

The fellowship curriculum is designed to comprehensively equip participants with the skills needed for impactful implementation science/research. It covers:

1. Foundational Implementation Science/Research Skills
2. Leadership and Management Skills
3. Interpersonal and Communication Skills
4. Personal and Professional Attributes

The schedule will include workshops, on-site projects, mentorship sessions, and dissemination activities. Details of the timeline and activities will be shared with successful applicants.
